

Host		Diagnosis	Confidence (to genus)			
Scientific Name	Common Name		Confirmed	Not Detected	Suspected	Inconclusive
		This section reports samples from all statuses. Each sample may have one or more diagnosis or identification; hence this section does not represent the total number of samples				

**Time Period Report for April 4<sup>th</sup> through April 17<sup>th</sup> 2017**

Scientific Name	Common Name	Diagnosis	Confirmed	Not Detected	Suspected	Inconclusive
<i>Allium cepa</i>	Onion	Stemphylium leaf blight ( <i>Stemphylium vesicarium</i> )	1	0	0	0
<i>Brassica oleracea acephala</i>	Kale	Herbicide injury; Exposure (Abiotic disorder)	0	0	1	0
<i>Brassica oleracea acephala</i>	Kale	Potyvirus Group (Potyvirus sp./spp.)	0	1	0	0
<i>Brassica oleracea var. acephala</i>	Collards	Herbicide injury; Exposure (Abiotic disorder)	0	0	1	0
<i>Brassica oleracea var. acephala</i>	Collards	Potyvirus Group (Potyvirus sp./spp.)	0	1	0	0
<i>Brassica oleracea var. botrytis</i>	Broccoli	Herbicide injury; Exposure (Abiotic disorder)	0	0	1	0
<i>Brassica oleracea var. botrytis</i>	Broccoli	Potyvirus Group (Potyvirus sp./spp.)	0	1	0	0
<i>Calibrachoa sp./spp.</i>	Million Bells	Unknown abiotic disorder (Abiotic disorder)	0	0	2	0
<i>Cichorium intybus</i>	Chicory	Aphids; Plant lice (Family Aphididae)	1	0	0	0
<i>Cichorium intybus</i>	Chicory	Cucumber mosaic (CMV) (Cucumovirus Cucumber Mosaic Virus)	0	1	0	0
<i>Cichorium intybus</i>	Chicory	Herbicide injury; Exposure (Abiotic disorder)	0	0	1	0

Confirmed - The diagnosis was derived using approved molecular technologies, serological testing and/or morphological observations which allowed for the confirmation of the organism to Genus, species and/or race or pathovar level.

Not Detected -The sample was submitted as a suspect sample or as part of survey project. The pathogen was not detected on this sample at this time using approved molecular technologies, serological testing and/or morphological observations.

Suspected - Diagnostic symptoms of the pathogen were present but evidence of the pathogen could not be confirmed at this time. This term may also be used at the species level if confirmations cannot be made. This term may also be used with abiotic entries.

Inconclusive - Although a suitable sample was received, a reliable result could not be achieved. For example, the test kit may have not worked correctly and there was no sample material remaining to perform the test again. Or, no DNA was detected in a PCR analysis. Inhibitors may have been present in the sample. A second attempt may have been made with the same results. The only conclusion is to label the sample as inconclusive.

<i>Cichorium intybus</i>	Chicory	Potyvirus Group (Potyvirus sp./spp.)	0	1	0	0
<i>Cichorium intybus</i>	Chicory	Tobacco mosaic (TMV) (Tobamovirus Tobacco Mosaic Virus)	0	1	0	0
<i>Picea abies</i>	Norway Spruce	Dothistroma needle blight ( <i>Dothistroma</i> sp./spp.)	2	0	0	0
<i>Picea abies</i>	Norway Spruce	Scale insects (Order Homoptera)	1	0	0	0
<i>Picea abies</i>	Norway Spruce	Spider mites (Family Tetranychidae)	1	0	0	0
<i>Picea abies</i>	Norway Spruce	Spruce bud scale ( <i>Physokermes</i> sp./spp.)	1	0	0	0
<i>Picea abies</i>	Norway Spruce	Stigmina needle blight ( <i>Stigmina lautii</i> )	1	0	0	0
<i>Picea abies</i>	Norway Spruce	Unknown abiotic disorder (Abiotic disorder)	0	0	1	0
<i>Picea</i> sp./spp.	Spruce	Adelgid ( <i>Adelges</i> sp./spp.)	1	0	0	0
<i>Picea</i> sp./spp.	Spruce	No pathogen found (Identification Analysis)	1	0	0	0
<i>Picea</i> sp./spp.	Spruce	Root damage (Abiotic disorder)	0	0	1	0
<i>Picea</i> sp./spp.	Spruce	Unknown abiotic disorder (Abiotic disorder)	0	0	1	0
<i>Picea</i> sp./spp.	Spruce	Rhizosphaera needle cast ( <i>Rhizosphaera</i> sp./spp.)	1	0	0	0
<i>Picea</i> sp./spp.	Spruce	Scale insects (Order Homoptera)	1	0	0	0

Confirmed - The diagnosis was derived using approved molecular technologies, serological testing and/or morphological observations which allowed for the confirmation of the organism to Genus, species and/or race or pathovar level.

Not Detected -The sample was submitted as a suspect sample or as part of survey project. The pathogen was not detected on this sample at this time using approved molecular technologies, serological testing and/or morphological observations.

Suspected - Diagnostic symptoms of the pathogen were present but evidence of the pathogen could not be confirmed at this time. This term may also be used at the species level if confirmations cannot be made. This term may also be used with abiotic entries.

Inconclusive - Although a suitable sample was received, a reliable result could not be achieved. For example, the test kit may have not worked correctly and there was no sample material remaining to perform the test again. Or, no DNA was detected in a PCR analysis. Inhibitors may have been present in the sample. A second attempt may have been made with the same results. The only conclusion is to label the sample as inconclusive.
