

Host		Diagnosis	Confidence (to genus)			
Scientific Name	Common Name		Confirmed	Not Detected	Suspected	Inconclusive
		This section reports samples from all statuses. Each sample may have one or more diagnosis or identification; hence this section does not represent the total number of samples				

**Time Period Report for July 17<sup>th</sup> through July 23<sup>rd</sup> 2018**

<i>Buxus sempervirens</i>	Common Boxwood	Additional sample requested (Identification Analysis)	1	0	0	0
<i>Buxus sempervirens</i>	Common Boxwood	Crown and root rot (Unidentified Agent)	0	0	1	0
<i>Buxus</i> sp./spp.	Boxwood	Boxwood blight; Leaf and stem blight ( <i>Calonectria pseudonaviculata</i> )	1	0	0	0
<i>Fragaria x ananassa</i>	Commercial Strawberry; garden strawberry	Crown and root rot ( <i>Phytophthora</i> sp./spp.)	0	3	0	0
<i>Fragaria x ananassa</i>	Commercial Strawberry; garden strawberry	Unknown abiotic disorder (Abiotic disorder)	0	0	3	0
<i>Juniperus horizontalis</i>	Blue Carpet Juniper	Non-pathogenic; Saprophyte (Secondary Agents; Saprophytes; Unspecif.)	1	0	0	0
<i>Juniperus horizontalis</i>	Blue Carpet Juniper	Spider mites (Family Tetranychidae)	1	0	0	0
<i>Malus domestica</i>	Domestic Apple	Bitter rot ( <i>Colletotrichum</i> sp./spp.)	1	0	0	0
<i>Malus domestica</i>	Domestic Apple	Marssonina Blotch ( <i>Diplocarpon mali</i> )	1	1	0	0

Confirmed - The diagnosis was derived using approved molecular technologies, serological testing and/or morphological observations which allowed for the confirmation of the organism to Genus, species and/or race or pathovar level.

Not Detected - The sample was submitted as a suspect sample or as part of survey project. The pathogen was not detected on this sample at this time using approved molecular technologies, serological testing and/or morphological observations.

Suspected - Diagnostic symptoms of the pathogen were present but evidence of the pathogen could not be confirmed at this time. This term may also be used at the species level if confirmations cannot be made. This term may also be used with abiotic entries.

Inconclusive - Although a suitable sample was received, a reliable result could not be achieved. For example, the test kit may have not worked correctly and there was no sample material remaining to perform the test again. Or, no DNA was detected in a PCR analysis. Inhibitors may have been present in the sample. A second attempt may have been made with the same results. The only conclusion is to label the sample as inconclusive.

Host		Diagnosis  This section reports samples from all statuses. Each sample may have one or more diagnosis or identification; hence this section does not represent the total number of samples	Confidence (to genus)			
Scientific Name	Common Name		Confirmed	Not Detected	Suspected	Inconclusive
<i>Medicago sativa</i>	Alfalfa	Spring black stem ( <i>Phoma medicaginis</i> )	1	0	0	0
<i>Medicago sativa</i>	Alfalfa	Summer black stem; Leaf spot ( <i>Cercospora medicaginis</i> )	0	1	0	0
<i>Pinus mugo</i>	Mugo Pine; swiss mountain pine	Red band needle blight ( <i>Dothistroma septosporum</i> )	1	0	0	0
<i>Pinus mugo</i>	Mugo Pine; swiss mountain pine	Root damage (Abiotic disorder)	0	0	1	0
<i>Pinus strobus</i>	Eastern White pine	Brown spot; Needle blight ( <i>Mycosphaerella dearnessii</i> )	12	0	0	0
<i>Pinus strobus</i>	Eastern White pine	Canavirgella needle cast ( <i>Lophophacidium dooksii</i> )	2	0	0	0
<i>Pinus strobus</i>	Eastern White pine	Dieback (Unidentified Fungus)	0	0	1	0
<i>Pinus strobus</i>	Eastern White pine	Insect damage (Unidentified Insect)	1	0	0	0
<i>Pinus strobus</i>	Eastern White pine	Needle blight; Cast ( <i>Bifusella linearis</i> )	2	0	1	0
<i>Pinus strobus</i>	Eastern White pine	Pine and spruce gall aphids (Family Adelgidae)	1	0	0	0

Confirmed - The diagnosis was derived using approved molecular technologies, serological testing and/or morphological observations which allowed for the confirmation of the organism to Genus, species and/or race or pathovar level.

Not Detected -The sample was submitted as a suspect sample or as part of survey project. The pathogen was not detected on this sample at this time using approved molecular technologies, serological testing and/or morphological observations.

Suspected - Diagnostic symptoms of the pathogen were present but evidence of the pathogen could not be confirmed at this time. This term may also be used at the species level if confirmations cannot be made. This term may also be used with abiotic entries.

Inconclusive - Although a suitable sample was received, a reliable result could not be achieved. For example, the test kit may have not worked correctly and there was no sample material remaining to perform the test again. Or, no DNA was detected in a PCR analysis. Inhibitors may have been present in the sample. A second attempt may have been made with the same results. The only conclusion is to label the sample as inconclusive.

Host		Diagnosis  This section reports samples from all statuses. Each sample may have one or more diagnosis or identification; hence this section does not represent the total number of samples	Confidence (to genus)			
Scientific Name	Common Name		Confirmed	Not Detected	Suspected	Inconclusive
<i>Pinus strobus</i>	Eastern White pine	Twig blight ( <i>Dermea balsamea</i> )	0	0	1	0
<i>Pinus strobus</i>	Eastern White pine	Unspecified pathology ( <i>Lophodermella</i> sp./spp.)	4	0	0	0
<i>Pinus strobus</i>	Eastern White pine	Unspecified pathology ( <i>Septorioides strobii</i> )	9	0	0	0
<i>Rhus aromatica</i>	Fragrant Sumac	Additional sample requested (Identification Analysis)	1	0	0	0
<i>Taxus baccata repandans</i>	Spreading English yew	Anthrachnose stem blight ( <i>Colletotrichum</i> sp./spp.)	2	0	0	0
<i>Taxus baccata repandans</i>	Spreading English yew	Crown and root rot ( <i>Phytophthora</i> sp./spp.)	1	1	0	0
<i>Taxus baccata repandans</i>	Spreading English yew	Insect damage (Unidentified Insect)	0	0	2	0
<i>Ulmus</i> sp./spp.	Elm	Stem canker (Unidentified Canker)	0	0	1	0
<i>Vaccinium</i> sp./spp.	Blueberry	Drainage problem (Abiotic disorder)	0	0	1	0
<i>Vaccinium</i> sp./spp.	Blueberry	Leaf rust ( <i>Naohidemycetes vaccinii</i> )	0	1	0	0
